PEAT BASE FOR MUSHROOM CASING

PRO·MOSS[®]

III BBK

THE PRODUCT

Our one-of-a-kind peat blend offers characteristics which will optimize your casing profile and structure and, therefore the quality of the harvest. This quality is defined by the harvesting method we use.

After working hand in hand with commercial growers, we have found that the main benefit of using this blend is improving the size, quality, quantity and cleanliness of the crops.

Inspired by the requests of current customers and the desire to answer market needs better; we have developed this all-natural peat blend by using the peat's natural qualities to optimize the structure, profile, and water-holding capacity of your casing. We are offering this unique solution to the North American market.

BENEFITS

MUSHROOMS:

- Improved shelf life
- Increased water uptake
- Heavier mushrooms
- Stronger growth
- Cleaner mushrooms

CASING:

- Increased water-holding capacity for less evaporation
- Slow and consistent water uptake throughout the growing period
- Reduced watering
- Structure allows for a good exchange between the compost and the casing
- Better water uptake for improved casing preparation and reduced labour
- Unique texture for improved casing profile
